

This transducer is used for measurement of Apparent Power for single phase (STE-A-6T) system as well as for 3-phase, 3-wire (STE-B-6T) system and 3-phase 4-wire (STE-C-6T) systems with balanced and unbalanced load. The output is a load independent DC current or voltage which is proportional to input power. The output can be connected directly to indicating instruments or to data transmission system.
